Dear Selection Committee,

Thank you for considering my request to join your company. I am greatly looking forward to the possibility of working alongside passionate individuals who share my interest in science and technology.

As a team-player, problem-solver and hard-worker, I am an excellent candidate for a position in your company. My internships at a medical research facility in Australia and at Porter Hospital in Vermont have taught me the value of cooperation and professionalism, providing me with the tools to adapt and excel in new, challenging environments. I am able to think critically and find creative solutions to problems, which has helped me to resolve conflicts between kids as a camp counselor and troubleshoot issues as an IT employee. The rigor of my academic schedule speaks to my strong work ethic; graduating pre-med and as a double major required efficiency, dedication, and special permission from my dean to increase my maximum course load.

Since realizing that a career in computer science would be more rewarding to me than one in medicine or biology, I have committed myself to building a strong theoretical foundation while learning coding languages and development tools. In school I developed a keen interest in and aptitude for algorithmic and data-structure related subfields, which I fall back on to help optimize code. I have experience building applications as part of a team, which taught me to remain flexible and accountable throughout the development process as I gained familiarity with agile development strategies. Perhaps most importantly, I learn quickly and am eager to pick up new skills, so I feel confident that I can become a valuable asset to your software engineering team.

Thank you for your time and attention. I am excited to discuss the position further, and am currently available for an interview scheduled at your convenience. I am also happy to talk at any time via email at maxwell.oliver.white@gmail.com or over the phone at (626) 222-1724.

Respectfully,

Max White
